- JavaScript
- Node.JS
- React.JS
- GraphQL
- MySQL
- Express.JS
- MongoDB
- Apollo Server
- Handlebars
- Bootstrap + MUI

Abu-Bakr Saddique

Junior software engineer

Projects

Event card creator

Event Card creator - this project takes the user through steps to create their event card. The user enters information about their event details on a form, selects their chosen food and music and all their information is then rendered on an event card template that they can print.

The created events are saved in local storage and the user can consult and edit them by going on the "My Saved Events" page.

Eco Bike Hire

A cleaner, healthier, happier world is possible, one pedal at a time.

Most journeys made in a car are for less than for distances of 5 miles or less. In fact, in the UK, of the journeys of 1-5 miles, over 80% are made by car. Cars produce .97 pounds of pollution per mile; bikes produce none. Bikes are also up to 50% faster than cars during rush hour.

Eco Bike Project was started because of our interest in environmental issues around pollution, sustainability and a healthier living space.

Weather Dashboard

This project is about developing a weather app which allows the user to search for a city by name and see the current weather and the 5 day forecast for that city. The user's search history is displayed and will be displayed.

This project is built with HTML, CSS and JS, and using jQuery and bootstrap. It uses the OpenWeatherMap API to gather the city's current weather data and forecast data. It also uses geolocation api (for user location) and country flags api for display purposes.

Work Experience

Self employed courier driver | UKED | Birmingham | March 2020 - present

A high pressure delivery system on behalf of our partner which requires intense concentration, good customer service skills and reaction problem solving skills.

Car sales executive | Trade Centre UK | Birmingham | 2018 - 2020

A Part of a big sales team providing second hand cars, taking customers through the full journey from selecting a car, preparing finance agreements, upselling additional items and handing over; ensuring customer satisfaction at every stage.

Telephony consultant | Lloyds banking group | 2016 - 2018

Working as part of a bigger team in an inbound call centre offering savings products, upskilling to personal banking, credit cards, business banking and complaints.
